## Green Meetings & Events

### *Help reduce food waste*

Talk to event planner about popular menu items. We use local food suppliers where possible to support our local economy and keep food miles to a minimum.

### *Make single use items your last choice*

We have opted to supply fresh drinking water from our well to meeting room delegates. Larger events will have bottled water and all of which will be recycled.

Paper and writing material is available to delegates but no longer forms part of the standard table set up.

If you are bringing disposable items to our venue, we politely ask that you choose a recyclable option.

### *Energy Conscious*

Use natural lighting as often as possible.

Use AV /IT equipment when required and switch off when not in use.

Video Conferencing opens your event up to a wider audience.

We use low energy lighting throughout the premises.

### *Enjoy the great outdoors*

Take advantage of the many outdoor activities on site for your team building events, Mini Golf, Tennis, Driving range, Foot Golf, Fitness activities.
