Ideas to make your Wedding Day **Greener**

Be conscious of Floral Arrangements

Talk to your florist about flowers that are in season at the time of your wedding. Use your bouquets to add décor to your cake table. Consider reusable floral centrepieces for tables rather than fresh.

Help reduce food waste

Talk to your wedding coordinator about popular menu items, serve your wedding cake with the evening food rather than after the meal. We use local food suppliers where possible to support our local economy and keep food miles to a minimum.

Wedding favours

Favours are a wonderful way to express appreciation, why not offer seeds for your Guests to sow or a charitable donation. Try to avoid donation card notices per Guest, display one large sign instead.

Ditch the Disposables

These items are thrown away after your wedding, items such as flip-flops, props, place card names. We have reduced the number of menus we print and dispose of.

Invest in experiences, rather than things.

Support Local

Support our local suppliers to help create jobs and to reduce carbon footprint.
