

## **Slieve Russell Hotel, Golf & Country Club Energy Management Policy (2023)**

The SRHGCC recognizes the importance of energy efficiency and greenhouse gas emissions mitigation. Our energy management strategies and cost-saving measures to improve operational efficiency while lowering GHG emissions. Procedures are in place and available to all Departments and Offices to facilitate compliance.

All Management, Staff and contractors are required to co-operate and support this Energy Management Policy by:

- Analysing energy cost and usage data monthly to identify priority areas for potential improvements
- Conducting energy audits, meter readings and facilitating the implementation of priority improvements
- Delivering energy efficiency awareness training to staff to improve conservation efforts
- Giving preference to A rated and energy efficient appliances with all purchases
- Giving consideration to & including within our budgets renewable energy options

To assist in raising the level of awareness and compliance regarding energy minimisation Department Heads and Duty Managers shall ensure that energy checklists are completed daily and end of day switch off is completed
