

## **Slieve Russell Hotel, Golf & Country Club Water Management Policy (2023)**

The SRHGCC recognizes that Water is a precious global resource.

Around 700 million people in 43 countries suffer today from water scarcity. By 2025, 1.8 billion people will be living in countries or regions with absolute water scarcity, and two-thirds of the world's population could be living under water stressed conditions.

All Management, Staff and contractors are required to co-operate and support this Water Management Policy by:

- Analysing water usage data monthly to identify priority areas for potential improvements
- Leak detection surveys completed
- Delivering water efficiency awareness training to staff to improve conservation efforts
- Guests are encouraged to assist with this programme with our towel re-use programme
- Rainwater is harvested to use on watering the golf course and cleaning Golf course machinery.
- All purchases for water use equipment must be consumption efficient such as aerator or sensor use.

To assist in raising the level of awareness and compliance regarding water minimisation Department Heads and Duty Managers shall ensure that they are observant to Dripping and leaking taps and unnecessary running water.
